Introduction to Bioinformatics course: IBT

Staff Training

Day 1 Part 11 – Classroom Team Biography

H3ABioNet

Pan African Bioinformatics Network for H3Africa

Introduction to Bioinformatics online course : IBT
Shaun Aron

Outline

- Importance of forming a community
- Team biographies

IBT Community

- The success of the course is based on developing a sense of community between classrooms
- Leverage on the fact that you are part of a larger community from diverse backgrounds all with a common interest in teaching and learning bioinformatics
- Easier to do this when you can put faces and a bit of context to your colleagues across the continent

Team Biography

- To facilitate this we would like each classroom staff team to write up a short biography about your institute and take a photograph of your team
- The short biography should be uploaded to the Vula forum together with the photograph as an attachment
- Each of classrooms will be able to view every classrooms biography and photograph

Team Biography

- We have provided instructions and a template for generating the biography here:
 - ✓ IBT_2017 STAFF site -> Resources -> Staff Training
-> IBT_2017 staff training day 1 part 11
template.docx
 - ✓ A single biography should be uploaded for each team – elect a person to upload the biography and photograph to Vula on behalf of the classroom

Team Biographies

- Have fun completing the biographies and include as much information as you like
- That's it for day 1 of the staff training!
